

# PROTEUS

Robotics platform for organising transfers between users and scientists

BUDGET

€5,289K

GRANTS OBTAINED

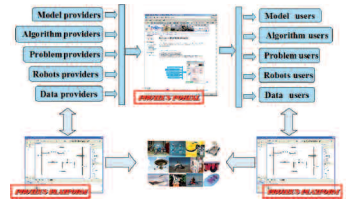

€2,096K

ANR FUNDING

2009 - 2013

## THE PROJECT

PROTEUS is a robotics development platform (backed by the GdR Robotique research grouping). Its purpose is to facilitate transfers between users (industrialists or academics), developers and scientists in the French robotics community. This platform will provide the community with a set of tools and documents allowing users to design and develop increasingly complex robotics applications.
